Company Profile

Pixel Digital Systems LLC, a leading multi-vendor Enterprise Services Provider since 1996, delivers end-to-end know-how in multiple verticals – Energy, Earth Minerals, Manufacturing, Construction, Healthcare, Education, Hospitality, BFSI, Government, Shipping & Logistics, Telecom among others.

Pixel is specialized in transforming unproductive paper based platforms and processes into efficiently managed smart ones, empowering organizations to provide their services in the "Smart platforms" domain.

In addition, due to our proficiency in the SAP and Oracle areas we also facilitate the improvement of core business ERP, Data Warehouse and enable CRM efficiency thus steering our customers safely into the digital future.
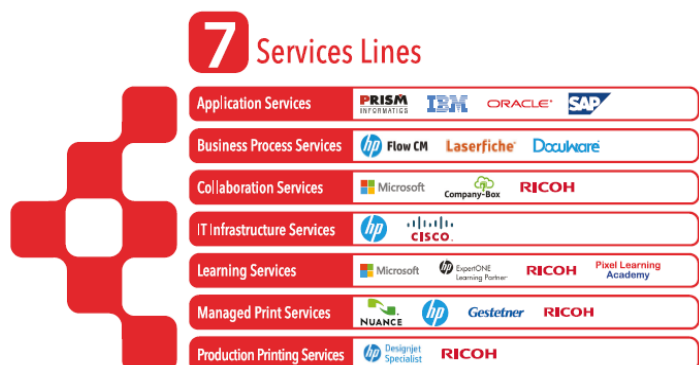

Pixel Digital Systems Provides Turnkey Solutions through 7 Services Lines of Business involving its own architects but also the best vendors on Solution & Services architecture:

- Managed Print Services (MPS) & Managed Document Services (MDS)
- E-learning Solutions – Collaboration – Interactive White Boards
- SAP / ORACLE / IBM COGNOS Implementation & Support Services
- ECM/BPM Management and Outsourcing Solutions
- On-site/Off site Backlog / Back-file conversion Services
- Software Analysis, Design, Development & Integrated Solutions
- Green IT Solutions with CSR reporting and target reduction
- Cloud Computing, SaaS, Solutions & Services
- Data Centres Design, Build, Implement & Support
- IT Outsourcing Services

Unequivocally the era of digital and smart business is here. Pixel has reinvented it's business offer, shifting the way the portfolio of products is created, priced and delivered to customer into a services-centric business approach.

Working with Pixel will now represent dealing with new ideas and competences and the certainty of having the appropriate tools, tactics, techniques and technologies to adapt your business to this rapid changing world.

Pixel has developed new products/services by building partnerships that provide a tailor made solution to each customer and is unquestionably the right partner to successfully transform you in a digital smart organization.

Innovate Today. Lead Tomorrow.

It is this emphasis on understanding our client's requirements prior to provide unique solutions, which often surpass expectations. Our focus is on how we can make our customer business more agile and performing. Our enthusiastic and experienced professional approach makes that each assignment is considered each time as a new challenge, conveying the most suitable offer always in an innovative approach of our solution portfolio.

In parallel, we interact with customers at a regular pace to register their feedback on the company's products and service; identifying the areas for improvement and thus take the appropriate action plan for customer satisfaction enrichment and its continuous nurturing.

Ultimately, Pixel Digital Systems LLC holds a rigorous outstanding entrepreneurial spirit, experienced process-innovation-mind set along with a document-centric expertise inherited by traditional office technology and represents today the best option to organisations that want to shift or exceed on the smart world.
